

**INCIDENT MANAGEMENT SITUATION REPORT
FRIDAY, DECEMBER 2, 2005 – 1000 MST
NATIONAL PREPAREDNESS LEVEL 1**

CURRENT SITUATION:

Initial attack activity was heavy nationally with 1,023 new fires reported for the week. Sixty-eight new large fires were reported, 53 in the Southern Area, nine in the Eastern Area and six in the Southwest Area. Fifty-five large fires were contained, 51 in the Southern Area, one in the Eastern Area and three in the Southwest Area. Very high to extreme fire indices were reported in Arizona, Nebraska, Kansas, Texas and South Dakota.

Presidential Disaster Declarations have been issued for Hurricanes Katrina, Rita and Wilma in Mississippi, Alabama, Louisiana, Texas and Florida.

A link to a map with resources mobilized for hurricane response is located at http://gacc.nifc.gov/sacc/predictive/intelligence/Resource_Map.pdf.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

HURRICANE RITA SUPPORT, Federal Emergency Management Agency.

A Type 1 Incident Management Team (Dietrich) is assigned. The Team is operating under a unified command with the Cameron Parish Sheriffs Department, State agencies and other federal agencies. A transfer of command to a Type 1 Incident Management Team (Martin) will occur today.

HURRICANE KATRINA/SUPPORT, Federal Emergency Management Agency. Emergency Support Functions (ESF) #4 in Mississippi and Louisiana are staffed.

A Type 2 Incident Management Team (Carlson) is assigned. The Team is managing a base camp at the Naval Construction Battalion Center in Gulfport, MS.

ANTIOCH, Chickasaw Agency, Bureau of Indian Affairs. This fire is eight miles west of Pauls Valley, OK in grass, brush and hardwood litter. High winds and extreme fire behavior were reported. Structure protection is in place.

VELMA COMPLEX, Oklahoma Division of Forestry. This fire is east of Velma, OK in grass and understory. Wind driven runs were reported.

ELMORE CITY, Oklahoma Division of Forestry. This fire is near Elmore City, OK in grass and hardwood litter. No new information was reported.

SOUTHWEST AREA INCIDENTS/LARGE FIRES:

RANGE, Las Vegas District, New Mexico State Forestry. This fire is near Floyd, New Mexico in grass. Very fast wind driven fire was reported. Evacuation of the town of Floyd occurred. Burned fences released livestock in the fire area.

MAES, Las Vegas District, New Mexico State Forestry. This fire is near Rio Rancho, NM in grass, pinyon pine and juniper. Structures are threatened, and structure protection is in place.

TATER, Coconino National Forest. This fire is 48 miles southeast of Flagstaff, AZ in hardwood litter. Burn out operations from roadways occurred. Spotted owl habitat is threatened.

OUTLOOK:

Weather Discussion: An upper level low pressure trough will move into the west and central portions of the country, with high pressure over the Southeast, Friday through the weekend. Dry weather will continue over Oklahoma, eastern New Mexico, and portions of Texas into next week. Critical conditions on Friday into Saturday over the region with windy weather and low relative humidity. Florida will remain dry as well; however western portions of the state will see an increase in relative humidity with onshore flow beginning Saturday. In Southern California, temperatures will rise and relative humidity will decrease with offshore flow beginning Saturday and continuing through early next week.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Southern California Showers over the region, locally heavy Central California and Santa Barbara and Ventura counties.	40 to 60 mountains. 60 to 70 valleys. 50 to 60 upper deserts. 60 to 75 lower deserts.	35 to 50%.	Southwest to northwest 15 to 25 mph with higher gusts.

BACKFIRING OR BURNOUT OPERATIONS

Backfiring or burnout operations are often critical operations in the fire management job. If planned and executed correctly, they can speed control of a fire and greatly reduce suppression costs. Conversely, if done incorrectly, they can endanger personnel, extend control time and increase cost. Safety considerations must always be given first priority. No backfiring or burnout action, regardless of strategic importance or other critical factors, is worth risking one human life!

- Backfiring or burnout operations must not jeopardize the safety of personnel or equipment or compromise suppression actions on adjacent portions of the fireline.
- One qualified individual must be responsible for controlling and directing the firing operation.
- Before beginning backfiring or burnout operations, assure that:
 - Lookouts are posted.
 - Communications are established with both firing and holding teams.
 - Escape routes and safety zones are established, known to all resources, and will not be compromised by the firing operations.
- If it is necessary, and time allows, concentrations of fuel adjacent to and inside the control line should be removed.
- Fuel outside the control line may be removed; concentrations of fuel may be scattered, covered with foam or wet down, or treated by ground or aerial retardant applications.
- Critical points such as hooks in the fireline, saddles or canyon may require extra holding forces.
